

Dan Hoang

San Jose, CA | Phone: 4087120556 | Email: danhoang@ucdavis.edu
LinkedIn: /in/dabhoang | Website: dabhoang.github.io | GitHub: dabhoang

EDUCATION

University of California, Davis

Davis, CA

Master of Science in Computer Science

June 2022

- Relevant Coursework: Distributed Database Systems, Computer Architecture, Design and Analysis of Algorithms

University of California, Santa Cruz

Santa Cruz, CA

Bachelor of Science in Computer Science

June 2020

- Relevant Coursework: Data Structures, Algorithms, Analysis of Algorithms, Database Systems, Software Engineering, Web Development, Computer Architecture, Principles of Computer Systems Design(Operating Systems), Computational Models, Computer Systems and Assembly language, Comparative Programming Languages, Technical Writing, Discrete Math, Vector Calculus, Linear Algebra, Probability and Statistics

EXPERIENCE

GaoTEK Inc.

Remote

Software Development Intern

July 2021 - present

- Perform research on standards for Group 3 facsimile communication over IP networks
- Collaborate with other interns to develop communications protocols according to those standards

Western Digital Corporation

Milpitas, CA

Systems Design Engineering Intern

June 2018 - September 2018

- Developed ULINK Drive Master's Power States Stress Test scripts for WDC NVMe devices
- Ensured that the drives were robust and complied with NVMe specifications
- Gained experience in computer systems and NVMe devices

UC Santa Cruz Baskin School of Engineering

Santa Cruz, CA

Reader / Grader

March 2020 - June 2020

- Evaluated 200+ students' homework assignments per week for the CSE 103 Computational Models course
- Addressed rubrics and common mistakes during weekly meetings with the instructor and other graders

PROJECTS

resilientDB

December 2020

- A high throughput yielding permissioned blockchain fabric/distributed database system written in C++
- Collaborated on a team of 5 to implement the Raft consensus algorithm

RosterSearch

October 2020

- Implemented a Python script that filters students on a roster, which is a CSV file, by matching patterns
- Performed unit testing on the functions involved in the script using Python's unittest framework

Personal Website

September 2020

- Built a personal website to display my professional background using HTML and CSS
- Successfully deployed the website using Github pages - <https://dabhoang.github.io/>

Collect

April 2019

- Created a command line based game in Java where the user travels through multiple cities to collect points
- Implemented breadth first search to determine connectivity of cities and shortest distance to items

SKILLS

Languages: Java, Python, C, SQL, HTML, JavaScript, CSS

Technologies: React.js, LaTeX, Microsoft Suite, Unix, Git
